Project Description:

MOSS installed a complex multi-media system in 21 classrooms in Orchard View early elementary schools, located in Muskegon, Michigan. All classrooms are equipped with VCR/DVD Combo, document camera, PC, Vbrick media delivery and a Crestron control system over Ethernet. MOSS had to switch mid-stream from a RF to IR microphone system, as there was unexpected interference from other installed wireless products within the school.

Product Solution:

- Lightspeed 700 IR wireless microphone system with ceiling-mounted IR receiver.
- Crestron RoomView Enterprise

Unique Conditions:

In addition, MOSS provided network drops and fiber termination for the entire building.

Results/Benefits:

This very cost-effective multi-media solution provides the school with flexibility for future growth.

Making technology work for business.
